Investment Objective

The Broadview Opportunity Fund seeks capital appreciation

Investment Strategy

The Broadview Opportunity Fund invests in stocks of companies of all sizes, but primarily invests in smaller capitalization United States companies, that have substantial capital appreciation potential. The Fund considers smaller capitalization companies to be those within the range of the Russell 2000® Index at time of purchase (as of 12/31/17 up to \$9.6 billion). The investment team seeks to purchase equity of businesses that are selling at what it believes are substantial discounts to prices that accurately reflect their future earnings prospects.

Investment Process

Pure bottom-up ideas are internally generated. The investment team exploits industry experience and contacts with suppliers, customers and competitors to identify companies that might be candidates for the portfolio. If a company meets most, but not all of our criteria, they are added to an extensive list of similar companies which are continuously monitored.

Broadview uses Five Pillar Analysis to determine if a company will be added to the portfolio. The five points are as follows:

STRONG BUSINESS TRAITS: Highly recurring revenue, return on investment capital, controllable destiny

DEFENDABLE MARKET NICHE: Strategic value, barriers to entry, difficult to duplicate

ATTRACTIVE GROWTH POTENTIAL: Focus on 2-3 year time horizon, we own companies don't rent stocks, across all industries

CAPABLE MANAGEMENT: History of successful strategic decisions, effective use of free cash flow, aligned with shareholders

DISCOUNT TO PRIVATE MARKET VALUE (PMV): Substantial discount at purchase, risk control, requires patience and discipline

Companies meeting all Five Pillars may be added to the portfolio. While not an automatic sell, any company in the portfolio can be removed for violation of any of the Five Pillars.

Fund Information

Net Asset Value (NAV)	\$34.53
Total AUM (Millions)	\$557.6
Ticker	BVAOX
Cusip	111328100
Inception Date	12/16/1996
Management Fee	1.00%
Other Expenses	0.25%

BROADVIEW OPPORTUNITY FUND (BVAOX)

Performance data quoted represent past performance. Past performance is no guarantee of future results and investment returns and principal value of the Fund will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. For current month end performance, visit www.bvafunds.com or call (855) 846-1463.

Total return includes reinvestment of dividends and capital gains.

There is no assurance the stated objective will be met or the investment process will consistently lead to successful investing. Investing involves risk, including the possible loss of principal.

The hypothetical example of a \$10,000 investment does not represent the returns of any particular investment.

P/E Ratio is the sum of a company's price-to-earnings, calculated by taking the current stock price and dividing it by the trailing earnings per share for the period.

Russell 2000® Index is an index measuring the performance of approximately 2,000 small-cap companies in the Russell 3000 Index, which is made up of 3,000 of the biggest U.S. stocks. The Russell 2000 serves as a benchmark for small-cap stocks in the United States.

Russell 2500® Index is a broad index, featuring 2,500 stocks that cover the small- and mid-cap market capitalizations. The Russell 2500 is a market cap-weighted index that includes the smallest 2,500 companies covered in the Russell 3000 universe of United States-based listed equities.

The Value of a \$10,000 Investment in Broadview Opportunity Fund from Its Inception (12/16/1996) to 3/31/2018 as Compared to Russell 2000® Index and Russell 2500® Index

Rising interest rates and trade negotiations quickly pricked this speculative market bubble in early February 2018. In our minds, this was a long time in coming. Super low interest rates since 2009 had set in motion a reach for yield and drove asset valuations to high levels while feeding speculation in sectors like technology. In our view, there has also been a flywheel effect caused by so much money flowing into passive investments, like index funds, that it essentially prevented normal corrections along the way. That abnormally low level of volatility only emboldened investors to put more money into equities. Against that backdrop, the market was overdue for a correction.

So where does that leave the Broadview Opportunity Fund? Several other nuances are very relevant to our thinking here as well. One, growth stocks have dramatically outperformed the rest of the market for a few years now, creating solid value in many overlooked industries. Secondly, the significant flow of money into S&P 500 Index-based funds has inflated many components of that index. Markets have a way of correcting these imbalances. We think this may be unfolding as we speak. Warren Buffet likes to say that in the short run the market is a popularity contest (today's technology stocks) while in the long run the market is a weighing machine. We believe the market is likely to rebalance toward the solid growing, fairly-valued companies that comprise the Fund's portfolio. Patience gains the day!
